

Air University Islamabad Department of Computer Science

LAB-1

SUBMITTED 19 Sep, 2026

Full Stack Front-End LAB Sir. Raja Faisal Umar

Submitted By:

Imad Khan	2500623
-----------	---------

Lab Objectives:

In this lab, we learned the basic concepts of HTML and CSS used to create and style web pages. We practiced creating HTML structures using elements such as headings, paragraphs, lists, images, links, tables, and cards. We also learned CSS concepts such as colors, fonts, borders, spacing, box model, and shadows. In addition, we practiced using Bootstrap components such as the grid, navbar, buttons, and cards.

Conclusion

This lab provided practical knowledge of creating and styling web pages using HTML, CSS, and Bootstrap. It helped us understand how to structure a webpage and make it more attractive and user-friendly.

Profile Page Submission

I have completed my profile page for Lab 01. The project includes the required HTML structure, such as the header, introduction, hobbies list, image, link, table, and card.

I have also added external CSS styling with colors, fonts, borders, box model, and shadows. Bootstrap components such as the grid, navbar, buttons, and cards are also included.
